On page 1881, when we are talking about radar capabilities, the text says: “but none of these radars has Doppler capability.”

It must be: “all of these radars has Doppler capability but not always have been operative.”

Caption on Fig. 10 says “The interval contours are 1 case/0.5 × 0.5 latitude longitude.”

It must be: “The interval contours are 3 cases/0.5 × 0.5 latitude longitude above 1.”
